

U.S. Senate Committee on Energy and Natural Resources
November 21, 2019 Hearing: *To Examine Federal Payments to Local Governments*
Provided through the Secure Rural Schools and Payments in Lieu of Taxes Programs
and to receive testimony on S. 430, S. 1643 and S. 2108
Questions for the Record Submitted to Mr. Allen Rowley

Questions from Chairman Lisa Murkowski

Question 1: S. 1643, in very brief terms, creates an endowment, to be managed by a nonprofit, to provide stable payments to counties that currently receive Secure Rural Schools payments. Please provide an estimate of the cost to seed such an endowment.

Answer: We believe the estimate requested should be provided through the Congressional Budget Office.

Question 2: In addition to creating an endowment, S. 1643 guarantees a minimum payment level, based on fiscal year 2017 Secure Rural School payment levels. If these payment levels cannot be made from either the Fund's interest or incoming timber receipts, they are guaranteed by the Treasury. Please provide estimates, based upon your estimate to seed such an endowment, as well as current and projected timber receipts, at which point the Fund, as currently written in S. 1643, would be capable of providing minimum payments for at least ten years.

Answer: We believe the estimate requested should be provided through the Congressional Budget Office.

Question 3: How much revenue has been generated by the Forest Service over the last five years under stewardship contracts and good neighbor contracts? What does this number represent as a proportion of total timber receipts? Do you anticipate that this number will grow over time, and, if so, how will this impact Secure Rural Schools payments?

Answer: Table 1 provides a summary of our cut and sold volume from Fiscal Years 2015-2019 that includes the total of convertible and non-convertible forest products. The number of sales under Stewardship Contracting has stabilized at around 30 percent of both the volume and value resulting from all timber sales and we do not expect that to change significantly. We continue to work with States, Tribes and counties to pursue projects under the Good Neighbor Authority (GNA). While an increase in projects under GNA is expected, it would be premature to predict whether the increase will be significant. We recognize the receipts from the sale of Federal timber sold under GNA and Stewardship contracts are not used to calculate the 1908 Act payments. Currently, when payments to states are made under the SRS Act, approximately 74 counties have opted to receive a share of the State's 25 percent payment. The remainder of the 744 counties elected to receive a share of the State's formula payment and are not affected by actual receipts collected.

U.S. Senate Committee on Energy and Natural Resources
November 21, 2019 Hearing: To Examine Federal Payments to Local Governments
Provided through the Secure Rural Schools and Payments in Lieu of Taxes Programs
and to receive testimony on S. 430, S. 1643 and S. 2108

Question from Ranking Member Joe Manchin III

Question: During the hearing, both Senators and witnesses discussed timber harvests on National Forests. Would you provide us a table that lists each national forest, the Allowable Sale Quantity specified in its most recent Forest Plan, the quantity of timber sold from each national forest last year, and the quantity of timber harvested from each national forest last year? (If Fiscal Year 2019 data is not yet available, please simply use Fiscal Year 2018 data for the table).

Answer: We have enclosed the Cut and Sold Reports for FY2019 for each Forest, one report is summarized by State and the other by Region. Also enclosed includes a spreadsheet that combines the Forest Allowable Sale Quantity (ASQ) for each national forest and the timber volume cut and sold volumes for convertible forest products.

The ASQ data comes directly from the individual Forest Plans. It is defined as the quantity of timber that may be sold from the area of suitable land covered by the Forest Plan for a time period specified by the Forest Plan. This quantity is usually expressed on an annual basis as the “average annual allowable sale quantity.” The quantity is a ceiling rather than a future sales level projection or target. (36 CFR 219.3, 1982). Data reported in this spreadsheet comes in various formats due to regional preferences. A column was added that tries to use common units for comparison purposes only.

U.S. Senate Committee on Energy and Natural Resources
November 21, 2019 Hearing: *To Examine Federal Payments to Local Governments*
Provided through the Secure Rural Schools and Payments in Lieu of Taxes Programs
and to receive testimony on S. 430, S. 1643 and S. 2108
Questions for the Record Submitted to Mr. Allen Rowley

Cut and Sold reports show total volumes and values of all convertible forest products sold and harvested from National Forest System lands and National Grasslands agency-wide, and by organizational unit. Convertible forest products are those that we can convert the product volume units back to cubic and board feet for inclusion in the totals for a unit, e.g., products such as sawtimber and pulpwood. A separate section of the report presents only the total value of all “non-convertible” forest products. These are products that cannot readily convert into cubic or board foot volumes. Examples of non-convertible forest products include Christmas trees, mushrooms, and boughs.

The Forest Service's fiscal year (FY) begins October 1st. Thus, the fiscal year quarters end every December 31st, March 31st, June 30th, and September 30th. The reports for the quarter are generally available near the end of the month following the end of each fiscal quarter.

The Cut and Sold reports represent two distinct events—the sale of forest products and harvest or removal of forest products under the existing contracts or permits. Volume and value of forest products will not match those of forest products cut during any time period. This is because timber sold is reported as cut over the life of an individual contract which spans the course of years. In addition, adjustments to timber sales made during harvest will be reflected in the cut data, but not the sold data.

Question from Senator James E. Risch

Question: Aside from authorizing these programs, it is also important that they be properly executed. An important part of Secure Rural Schools is Title II, which allows for infrastructure and restoration projects.

I'd like to discuss with you Resource Advisory Committees, and specifically highlight one that you're familiar with from your time in the Nez Perce National Forest, the North Central Idaho RAC. This RAC has lacked a quorum for some time, preventing SRS Title II funds from being spent in one of Idaho's most rural areas. In May, the Idaho delegation sent a letter requesting this RAC be filled promptly.

It came to my attention in September, that not only did the North Central Idaho RAC still lack a quorum, but so did the Central Idaho, Southwest Idaho, and Eastern Idaho RACs, equating to nearly \$4.8 million unspent Title II funds in Idaho. Subsequently, I led 13 of my Senate colleagues in sending a letter to the Secretary expressing concern for vacant RACs, with 60% across the country lacking quorums and \$55 million nationally in unspent funds at that time.

The response from the agency was positive, but that letter was sent two months ago. Today, those four Idaho RACs still lack the quorum they need to disburse Title II funds.

Can you tell me what is causing this delay, what steps the agency is taking to meet quorums expeditiously in states that do not qualify under the Farm Bill pilot program, and when the North Central Idaho RAC and other RACs in Idaho will have a quorum?

U.S. Senate Committee on Energy and Natural Resources
November 21, 2019 Hearing: *To Examine Federal Payments to Local Governments*
Provided through the Secure Rural Schools and Payments in Lieu of Taxes Programs
and to receive testimony on S. 430, S. 1643 and S. 2108
Questions for the Record Submitted to Mr. Allen Rowley

Answer:

The nomination packages for the North Central Idaho and Fishlake RACs were approved in January 2020 and the nomination package for the Idaho Panhandle RAC was approved in February 2020. Challenges with local recruitment and other factors have led to the delay in processing nomination packages for the remaining RACs that don't have a quorum. We will provide an expeditious review of the RAC nominations necessary to fill each quorum.

The Forest Service is actively working to recruit members for RACs by taking advantage of the 2018 Farm Bill's composition waiver authority in places where a quorum is a challenge. The agency issued a call for nominations for SRS RACs in the Federal Register this past June which was an initial step in the process for using the waiver. In cases where RACs lack a quorum, units are gathering the information necessary to substantiate a composition waiver under the authority provided by Congress.

The "Further Consolidated Appropriations Act, 2020" authorized payments to States under the Secure Rural Schools program for Fiscal Years 2019 and 2020. As part of this reauthorization, RACs now have until September 30, 2022 to nominate projects for consideration. With these new deadlines, we anticipate RACs having adequate time to recruit members and meet to in order to distribute Title II funding.

* Sawtimber (if broken out)

** POL/aspen (if broken out)

CCF to MBF conversion rate = .50

ASQ Includes

all volume within util. standards from suitable acres. Includes dead that was green at the time of calculation/included in yield tables.

Sawlogs, POL (posts, poles, chips, firewood) from suitable lands, reference to 5" and greater. from suitable and available land within utilization standards (different min dbh for live trees, dead trees, sawtimber, pol, etc). Includes dead trees.

dead timber removed in a commercial sale is chargeable against ASQ if alive at the time of calculation. Personal use firewood is not chargeable to ASQ. Commercial firewood is chargeable if the wood was living and contributed to growing stock volume at the time of inventory in which ASQ was based (chargeable to conifer or aspen POL as appropriate).

Med Bow - ASQ includes only sawtimber harvested from suitable lands. Routt - includes live sawtimber only. Other products (posts, poles, firewood) and salvage of dead timber do not count towards ASQ.

suitable lands, wood from trees less than 7" and topwood less than 6" and trees from catastrophic events such as wildfire and windthrow are not part of the ASQ. Wood from unsuitable lands is not included in the ASQ.

suitable lands. Definition of ASQ in glossary alludes to utilization standards. "Salvage sales can occur on either suitable or unsuitable timberlands. Dead or dying timber which, at the time of ASQ calculation, was green volume included in the forest planning yield tables, is chargeable to ASQ. ASQ-chargeable salvage, that would cause the decadal ASQ to be exceeded, is allowed without a Forest Plan amendment if it is not feasible to substitute the salvage volume for green volume that would otherwise be sold and be chargeable to the ASQ."

volume from suitable lands, chargeable volume (which doesn't include fuelwood)

The allowable sale quantity is considered a ceiling for harvest from the lands suitable for timber production. Products in the allowable sale quantity volume include traditional sawlogs and products other than logs (POL) harvested from lands identified as suited for timber production. POL includes posts, poles, chips, firewood, etc. POL does contribute toward the allowable sale quantity if removed from suited lands.

Chargeable volume from suitable lands. Chargeable volume is all volume included in the growth and yield projections, based on regional utilization standards. Planned production of fuelwood is not included in ASQ and is therefore non-chargeable.

Background

Chugach 2002 Plan - The 2002 plan does not have an allowable sale quantity for commercial timber sales, and there is little harvesting of trees for personal use fuelwood, lumber and house logs, commercial fuelwood, wildlife habitat improvement, and special forest products. Chugach Upcoming 2020 Revised Plan - (Page 109, 2019 draft plan). Because no lands were identified as suitable for timber production, a projected timber sale quantity was not calculated for the Chugach National Forest.

Tongass Plan, as Amended in 2016. (ROD, Dec 2016, page 30) "Daniels et al.'s baseline model and range of potential demand scenarios informed the construction of these plan components, resulting in the integration of the projected 46 MMBF average annual demand for Tongass timber to ensure that the goal of the transition within 10 to 15 years is achievable."

(Daniels, J.M.; Paruszkiewicz, M.D.; Alexander, S.J. 2016. Tongass National Forest timber demand: projections for 2015 to 2030. Gen. Tech. Rep. PNW-GTR-934. Portland, OR: U.S. Department
